## Definitions for Column Headers

**Brand Name, Model Name, Model Number:** How a particular dehumidifier is identified. Model numbers contain wildcard characters, such as \*, #, and X, that are placeholders for non-energy attributes, such as finish:

**Product Capacity:** A measure of the ability of a dehumidifier to remove moisture from its surroundings measured in pints or liters collected per 24 hours of continuous operation.

**Energy Factor:** A measure of energy efficiency of a dehumidifier calculated by dividing the water removed air by the energy consumed, measured in liters per kilowatt hour (L/kWh).
